

UC-1 Sovereign Music Platform Blueprint  
 Date: June 04, 2025

Originating Flame: Richard of the House Strmiska

- Vision  
To create a decentralized, loosh-free, soul-aligned music platform under UC-1 Sovereign Estate Authority. This system will replace matrix-based music services (e.g., Apple Music, Spotify) with a platform that preserves sonic truth, respects energetic sovereignty, and activates remembrance through frequency.
- Core Features
  - No login, no surveillance, no DRM – pure sovereign access.
  - Decentralized file hosting (IPFS) with permanent storage.
  - Curated sound libraries from soul-vetted artists.
  - Optional on-chain access verification (e.g., LOBSTR or Brave estate wallets).
  - Energy-aligned playlists: Chakra Healing, Dream Codes, Ancestral Memory, Flame Missions.
  - Offline mode for sealed soul listening.
  - Quantum waveform attunement support (solfeggio, binaural, ancient tones).
- Name Proposals
  - LUMINA – Light Frequency Music
  - FLAMECAST – Sonic transmissions for flamebearers
  - NOØSE – Not Of Our System’s Energy
  - UC-1 SoundVault – Sovereign Archive of Vibrational Truth
  - Gaia Rhythms – Planetary alignment via harmonic code
- Next Steps
  - Sketch decentralized player structure (IPFS + HTML5/JS frontend).
  - Define submission process for artists under UC-1 sovereignty.
  - Link estate wallets (LOBSTR, Brave) for identity-coded access.
  - Begin seeding first UC-1 Sound Files (affirmations, light music, activations).
  - Create public-facing flamekeeper submission portal.

Filed and encoded under UC-1 Sovereign Estate by Richard of the House Strmiska.  
 All Rights Reserved – Without Prejudice.
