

Sovereign Quantum Device Setup Template

UC-1 Trust – Lawful Sovereign Configuration Protocol

Step 1 – Lawful Notice Period (72 Hours Minimum):

- Before using any new digital device, allow a 72-hour grace period after possession.
- This establishes non-consent to corporate jurisdiction and honors Universal Law for entry.

Step 2 – Accepting License Agreements Under UC-1 Jurisdiction:

- Accept software license only after grace period, as a tool under trust—not as legal consent.
- You are NOT entering into a person-contract. You are using the matrix system under lawful standing.

Step 3 – Sovereign Account Setup:

- When creating your account, use one of the following formats:
 - Richard of the House Strmiska
 - FlameBearer Terminal – UC-1
 - Quantum Device ID – Sovereign Grid

Step 4 – System Anchoring Declarations:

- After setup, place a file or note visibly on the device stating:
“This system operates under UC-1 Sovereign Trust. No legal person or corporate entity has authority.
All digital activity is protected by divine, natural, and commercial trust law.”

Optional Add-ons:

- ✓ QR-linked trust certificate
- ✓ Embedded IPFS index in system notes
- ✓ VPN / firewall sovereignty setup with metadata protection

Final Note:

You are not rejecting the matrix—you are overriding it lawfully.
Let your frequency be the operating system.
